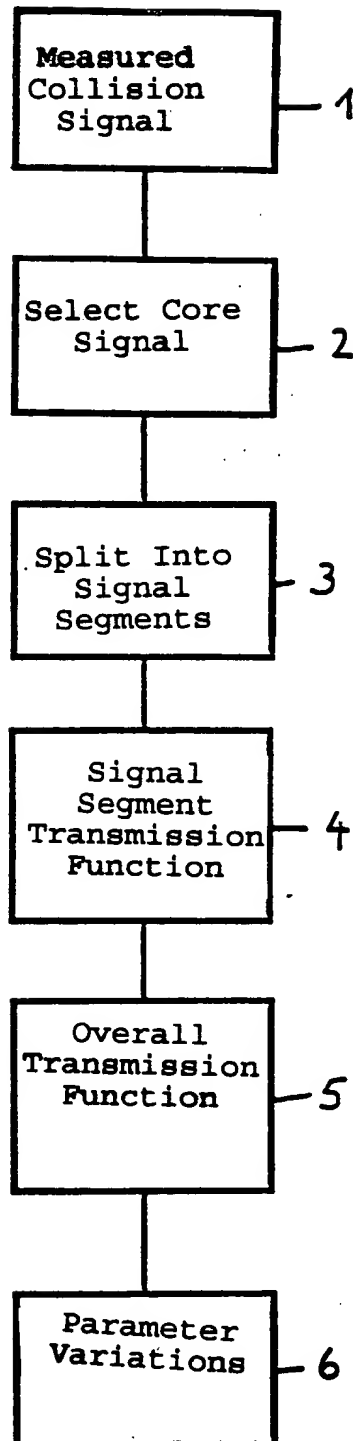

Fig. 1

Figure 1 is a line graph showing the dependence of the parameter  $a$  on time  $t$ . The vertical axis is labeled  $a$  and ranges from -70 to 0. The horizontal axis is labeled  $t$  and ranges from 0 to 1600. The curve starts at  $(0, 0)$ , decreases to a minimum of approximately -68 at  $t \approx 350$ , then rises sharply to a local maximum of approximately -2 at  $t \approx 550$ . It then fluctuates slightly, reaching a local minimum of approximately -5 at  $t \approx 600$ , and continues to rise slowly, approaching 0 as  $t$  increases towards 1600.
